

Brief Biosketch:
Hatem Krema, MD

Hatem Krema, MD is an A. Professor in the Department of Ophthalmology and Vision Science of the University of Toronto- Toronto, Ontario, Canada.
He is the Director of the Ocular Oncology service of Princess Margaret Hospital of the University Health Network, University of Toronto.

He graduated from Cairo University in 1990 and obtained his Master's degree in Ophthalmology from the same University. He was elected a fellow of the Royal College of Surgeon of Edinburgh, United Kingdom in 1997. He started his training in Ocular Oncology at the Royal Liverpool University Hospital, England, United Kingdom; and at Bascom Palmer Eye Institute in the University of Miami, Florida, USA. He completed his fellowship training in ocular oncology at Wills Eye Institute, Thomas Jefferson University, Philadelphia, Pennsylvania, USA; and was also trained as a clinical fellow in Ocular Oncology at the University of Toronto.

With his clinical and surgical duties, Dr. Krema has a full-schedule of teaching and academic activities. He has been invited to provide courses and teaching sessions in ocular oncology to residents and fellows in several countries, and he was granted The Residents' Award for the best Teacher in the Department of Ophthalmology of the University of Toronto in 2013.

He has been also invited as a guest speaker in several national and international conferences, and he is a frequent presenter and moderator in international ophthalmology meetings, with over 150 paper presentations.

He is an ad-hoc peer reviewer to a number of high-ranked Ophthalmology journals, and he has been the ocular oncology section editor to a number of ophthalmology journals, including the Canadian journal of Ophthalmology.

Dr. Krema is interested in translational clinical research in the field of ophthalmic oncology. His focus is on defining better algorithms for radiotherapy, management of treatment complications, interpretation of modern ancillary diagnostic imaging, and the role of molecular genomics in identifying patients at risk of metastatic disease.

He has around 50 peer reviewed journal publications in the field of Ocular Oncology.
