Dear Friends and Colleagues:

On behalf of the EGVRs, it is our great pleasure to welcome you to the **19th Egyptian Vitreoretinal Society (EGVRS)** Meeting that will be held on **16-17 June 2022** at Hilton King's Ranch Hotel Alexandria, Egypt. EGVRS is considered to be the most prominent vitreoretinal society in the Middle East. This has been achieved through our continuous educational and scientific activities and maintaining a high standard of our scientific content. Our aim is to keep it as one of the landmark Retina Meetings in the region.

We are proud to present a very interesting program with distinguished faculty. The meeting format aims at creating interactive fruitful discussions about down to Earth, real-life challenges that all Retina specialist meets in their daily practice. Surgeons will even confess their sins in our surgical courtroom.

The highlight of the meeting is to celebrate the current leading role of Female retina surgeons and medical retina specialists in 2022 in the world and in Egypt. We are proud to host a great line up of Female retina doctors for the first time which will make it a landmark meeting.

We hope that you will enjoy the Congress and that your interaction with your colleagues will stimulate the creative exchange of ideas and will be personally rewarding.

Our aim is not just to learn a new technique, but to leave this meeting and you have made many more good friends.

IMPORTANT PRODUCT INFORMATION

INDICATION: This device is indicated for providing magnified stereoscopic images of objects in real-time or from recordings. It may also display real-time information from the Constellation® Vision System. **WARNINGS:** The system is not suitable for use in the presence of flammable anesthetics mixture with air or with oxygen. There are no known contraindications for use of this device. **PRECAUTIONS:** Do not touch any system component and the patient at the same time during a procedure to prevent electric shock. When operating in 3D, to ensure optimal image quality, use only approved passive-polarized glasses. Use of polarized prescription glasses will cause the 3D effect to be distorted. In case of emergency, keep the microscope oculars and mounting accessories in the cart top drawer. If there are any concerns regarding the continued safe use of the NGENUITY® 3D Visualization System, consider returning to using microscope oculars. **ATTENTION:** Refer to the NGENUITY® 3D Visualization System Operator's manual for a complete list of appropriate uses, warnings and precautions. Regarding the Constellation® Vision System can be connected to the NGENUITY® 3D Digital Visualization System. Please refer to the Constellation® Vision System Operator's manual for complete instructions, warnings and precautions.
